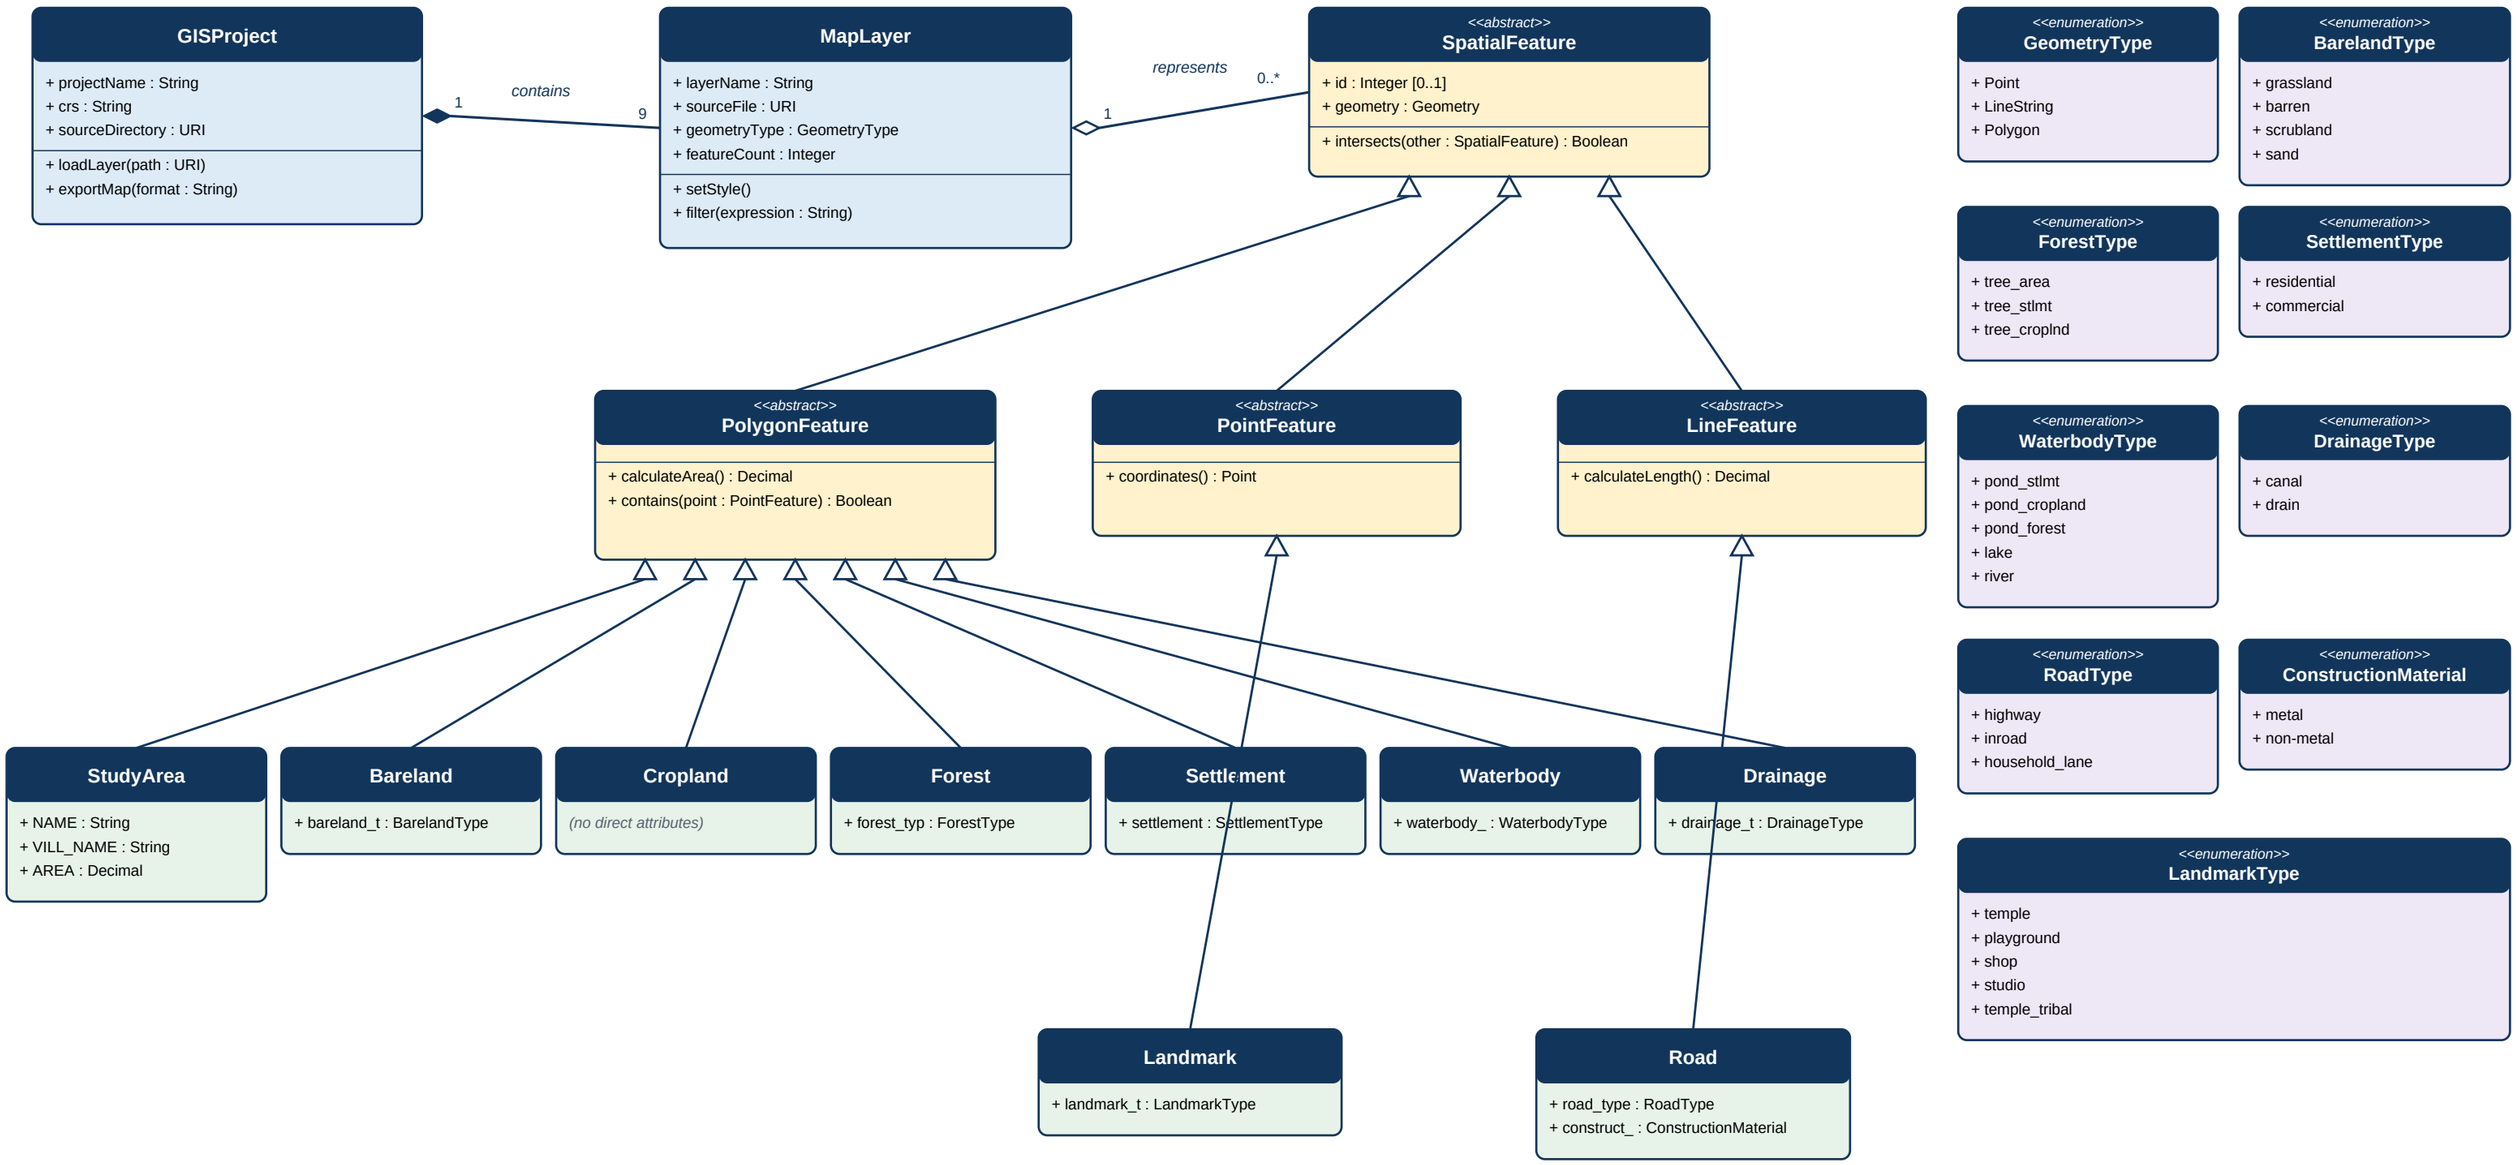
UML Class Diagram: GIS Mapping of Murakata, Sankrail

Assignment 2 | Derived from the submitted Assignment 1 QGIS shapefile schema and QML categories



Legend

generalization (inheritance) | composition | shared aggregation | Yellow = abstract class; green = concrete feature; purple = enumeration

Traceability: feature-specific attributes retain DBF field names. Categories follow QML styles; LandmarkType lists observed records.

Nine source layers: boundary, bareland, cropland, drainage, forest, landmarks, roads, settlement, and waterbody. No cross-layer key is present.
