EA 17.2 Unregistered Trial Version

Group 08: Ashutosh Sharma (23CS10005), Krishnkant Sahu (23CS10035), Sanskar Sovitkar (24CS10131)

Source: Group 08 Assignment 1 QGIS project of Murakata and Sankrail (nine shapefile layers). Attribute names are the DBF field names. Enumeration values are the category values in each layer's QML style; ConstructionMaterial has no QML style, so its values come from the roads attribute table. The drainage shapefile has 0 features, so Drainage follows its field definition and QML style. The layers share no keys, so no feature-to-feature associations are modelled.
